

Nomentia Reporting

Treasury reporting based on group-wide data retrieved from any system or bank. Centrally build insightful treasury reports and analyze treasury data.

Report on all treasury data within one reporting platform

Centralized reporting

Automatically consolidate reliable group-wide data from different systems and leverage straightforward filters that are based on various data elements.

Connectivity

Connect Nomentia Reporting to any TMS, ERP system, and trading platform, or market data provider. Connect also to any bank using host-to-host, EBICS, SFTP, and SWIFT connectivity.

Integrations

Use Excel or Power BI to analyze data and prepare reports. Directly access master data, structures, and instruments from all source systems through Excel pivot objects. Build dashboards and reports with convenient filters and drag and drop functionalities.

"The switch from Excel to Nomentia not only delivered major time savings but the project was also particularly well organized and structured. We still benefit from Nomentia's professionalism today when we need to contact the support team."

Treasury Expert,
DKV Mobility Services Group

Transparency at all levels of the organization

Centralized reports

-

- **Fetch** all relevant data from various systems into one place.
- **Drill down** from high-level graphs and tables to single transactions.
- **Change** graph types or expand on graph data or tables with interactive dashboards.
- **Additional** tailor-made data filters to fit any requirement.
- **Drag and drop** report building in Excel.

Automation

- **Automated** data consolidation from different source systems.
- **Self-served** reports with expert help when needed.
- **Complement** automated reports with manual data inputs.
- **Reports** are updated at regular intervals to reflect the most recent changes.
- **Use** pivot tables with straightforward filters to visualize all cash flow data.

Integrations

- **Use** Power BI or Excel to analyze data and prepare reports.
- **Connect** to TMS, ERP systems, and trading platforms.
- **Connect** to any bank using host-to-host, EBICS, SFTP, and SWIFT Alliance Lite2 connectivity.
- **Connect** to market data providers.
- **Present** data in any format: online, Excel, PDF, and more.

About Nomentia
